

GALFER TSUNAMI OVERSIZED ROTOR KIT

APPLICATION: All bikes (tested here on 2008 Yamaha YZ250F)

PRICE: \$371

RATING: 9

9

// WHAT IT IS: Galfer's Tsunami kit comes complete with a rotor, caliper bracket, and brake pads.

// HITS: All parts needed to complete installation are included in one package: mounting bracket, brake pads, and the rotor. Smartly engineered, the kit was surprisingly easy to mount and the entire process took under 20 minutes to complete. Stopping power was increased considerably and the benefits were immediate, as the rotor and pads required no break-in period. Though the stopping power was boosted considerably, the front binder maintains a smooth, predictable feel.

// MISSES: Beginner to novice-level riders will be unable to completely enjoy the benefits of this kit, \$371 is a lot to pay for some aesthetic "bling."

// THE VERDICT: If you are skilled enough to take advantage of a healthy dose of additional stopping power, the Tsunami kit from Galfer is an excellent choice.

ONLY ONE HELMET: ★★★★★

"The MXA wrecking crew had never given a helmet five stars. Now we have! This is the best helmet ever tested!"
(MOTOCROSS ACTION, January 2007)

"Arai developed quick-release cheek pads which can be easily removed by medical staff to aid an injured rider. It's a little change that could make a big difference ... Arai is adamant about keeping the size and shape of its helmet oval and smooth (including the chin bar). The philosophy is this: the less there is for the ground to grab, the less your head and neck will move ... the liner is superb in fit ... All external visor screws remain plastic which, by design, break when the visor is pulled or pushed upon impact – an extremely good thing ... What we really think about when we put on a helmet are safety and confidence. And everyone of us feels that when we're wearing an Arai ... Rating: 95"
(DIRT RIDER, November, 2007)

"The new VX-Pro3 is flat stunning ... rates as one of the best of the best."
(DIRT BIKE, Feb, 2007)

"The VX-Pro3 is one of the most comfortable helmets we have ever worn ... one of the best parts, though, is the ventilation ... As for quality and craftsmanship, it's second to none ... so why not spend the few extra dollars and keep yourself safe with the Arai VX-Pro3? Enough said." RATING: 9.5
(TRANSWORLD MOTOCROSS, January 2007)

"Arai's latest and greatest VX-Pro3 helmet is just that. The VX-Pro (DC) was already considered by many, including us, as the off-road helmet by which all others should be judged, but, somehow, Arai found ways to improve upon it with the new VX-Pro3 helmet."
(CYCLE NEWS, March 7, 2007)

"Performance of the new VX-Pro3 is awesome. Fit is excellent ... The new ventilation system is very effective. There is a huge difference in the airflow with the vents open or closed ... THE VERDICT: We're very impressed with the comfort, styling, and ventilation and features of the new Pro3. It's the most comfortable ... helmet we've ever worn!"
(4-WHEEL ATV ACTION, March, 2007)
